live

Username: 51364396

Password: 271264

Welcome to Ironbeam! We're delighted you're here to explore our cutting-edge trading platform. Here are your Lifetime demo credentials to get started:
 demo
Username: 51364392
Password: 854911

```python
import requests

account_id = "account
url = "https://demo.ironbeamapi.com/v1/auth"

payload = {
  "username": account_id,
  "password": "API key"
}

headers = {"Content-Type": "application/json"}

response = requests.post(url, json=payload, headers=headers)

data = response.json()
print(data)
token = data['token']
print(token)
```

The response will contain a token that will be used in the Authorization header for all other requests. For example in Python:

```python
headers = {
  "Authorization": "Bearer " + token
```

```
}
```

Example call to get the account ballance in Python (without generated client library):

```
import requests

account_id = "account
url = "https://demo.ironbeamapi.com/v1/account/" + account_id + "/balance"
query = {
  "balanceType": "CURRENT_OPEN"
}
headers = {"Authorization": "Bearer "+your_Bearer_token_here}

response = requests.get(url, headers=headers, params=query)

data = response.json()
print(data)
```

API URLs

REST API

Environment	URL	Authentication	Description

| fxTrade Practice | https://api-fxpractice.oanda.com | Required. Details Here | A stable environment; recommended for testing with your fxTrade Practice account and your personal access token. |
| fxTrade | https://api-fxtrade.oanda.com | Required. Details Here | A stable environment; recommended for production-ready code to execute with your fxTrade account and your personal access token. |

Streaming API

Environment	URL	Authentication	Description
fxTrade Practice	https://stream-fxpractice.oanda.com/	Required. Details Here	A stable environment; recommended for testing with your fxTrade Practice account and your personal access token.
fxTrade	https://stream-fxtrade.oanda.com/	Required. Details Here	A stable environment; recommended for production-ready code to execute with your fxTrade account and your personal access token.

Our documentation uses the fxtrade URL for all examples. To use a different environment simply replace the base of the url with the appropriate one listed above and follow any necessary authentication.

Request and Response Details

All requests with a body require `Content-Type: application/json` unless specified otherwise.

All responses will have `Content-Type: application/json` unless specified otherwise.
